Vivienne Bozalek

Haptic Sensing in Camissa Kelp Forests

Online 'rockpool' meeting ~ free to attend

Tuesday, 6 June 2023 ~ 17.00 – 18.30 CEST

Artist and [science communications](#) researcher [Meghan Judge](#), in conversation with Camissa-based kelp ecologists and decolonial storytellers [Nasreen Peer](#) and [Loyiso Dunga](#)

By looking at the **haptic "haptera" of the kelp forest's holdfast**, they consider what can be learned from this nurturing environment for sensing life and reorienting within oceanic relations. They engage limits of knowability, the potentials of strangeness in the known unknowns, and a **transcendental language of scale and enchantment** that **ecosystems within ecosystems** can offer for **listening beyond hearing**.

If you can, bring headphones for immersive listening.

T ~ **Thyssen-Bornemisza**
B **Art Contemporary**
A **Academy**

Hosted by the Underwater Urban Ecosystems group on the ocean comm/uni/ty, TBA21 – Academy's social space for ocean lovers
